051/44		
25X1A	i.	Comment. As it is not believed that the Schoenefeld airfield will be used as permanent quarters for Soviet troops, the 1,000 soldiers observed may have been transferred there to participate in an air transport practice.
	2.	Comment. As the information by the two sources of paragraphs 3 and 4
	K.	confirm each other, it is believed that the 9th Mecz Div started tank
		firing practices at Weisswasser in mid-January 1953. Similar observations
		were also made at other training grounds in East Germany.
	3	Comment. The information indicates no change in the occupation of
		the Prenzlau post compared with a report of mid-December 1952. See
		The trucks seen en route toward the Templin troop training grounds probably belonged to units of the 25th Tank Div stationed
		in Frenzlau, which presumably participated in short-term tank firing practice
		at the training grounds. The unloading of tank details of the Fourth Car
		Mecz Army was observed in Templin on 18 January 1953.
